

Kyle Nishiyama,

Department of Mechanical Engineering,
University of Calgary

- CaMos Mentor – Dr. Steven Boyd,
University of Calgary
- Research Project Title - On vivo quantification
of cortical bone porosity by high-resolution
peripheral quantitative computer tomography.

Lisa-Ann Fraser,

Department of Medicine, Health Research,
McMaster University

- CaMos Mentor - Dr. Alexandria Papaioannou
McMaster University
- Research Project Title – The study of Canadian
women, who sustain a fragility fracture, to
determine if a care gap is present.

Congratulations to both Kyle and Lisa-Ann as they move forward with their interesting research. Both winners will be profiled in greater detail in the next OC-SAC Research Report due to come out in the fall.

Congratulations to all of the candidates who applied for the quality of their applications. We wish them all the best as they move forward with their meaningful contributions in the field of Osteoporosis.
